

Backend Requirement

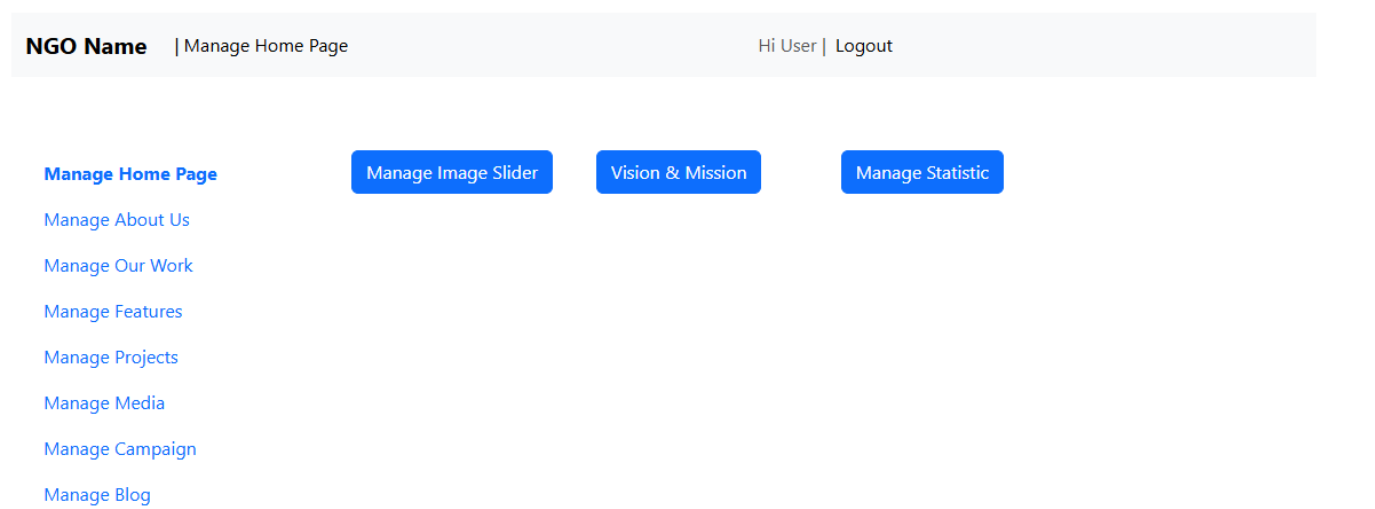

Learner need to design a Backend for the admin so that admin can have a control over the content management of all the content on the Home page.

Content include change in textual content, image content etc.

Following backend show is a reference backend Dashboard shown to the admin.

Admins must login with its credentials to access the dashboard.

Backend Dashboard

Manage Image Slider

If there is need to change the images in the slider, Admin must click on the manage image slider button and then it will direct the admin to Manage Image slider Dashboard. Where admin will get a provision to add an image and to update an existing image.

Manage Home Page

[Manage About Us](#)

[Manage Our Work](#)

[Manage Features](#)

[Manage Projects](#)

[Manage Media](#)

[Manage Campaign](#)

[Manage Blog](#)

Enter Image Name:

Upload Image for Slider:

Choose File

No file chosen

Save

Sr.No	Image Name	Image	Edit	Delete
1	Imparting Education		Edit	Delete
2	Food For Everyone		Edit	Delete

Vision and Mission Section

If admin need to make any changes in the vision and mission statement then he can access Vision and mission button which direct the admin to Vision and mission dashboard as shown below.

NGO Name | [Manage Home Page](#) Hi User | [Logout](#)

Manage Home Page

[Manage About Us](#)

[Manage Our Work](#)

[Manage Features](#)

[Manage Projects](#)

[Manage Media](#)

[Manage Campaign](#)

[Manage Blog](#)

Enter Vision Statment

Enter Mission Statment

Save

Sr.No	Vision Statment	Mission Statement	Edit	Delete
1	Sample Vision Statement Here	Sample Mission Statement Here	Edit	Delete

This is Reference Dashboard. Learner Can Customize their own Dashboard

Similarly learner can create the Dashboard for managing other sections such as Manage Statistics, Manage Our Initiative etc on their Home page.
